This is in response to Applicant's amendment filed on August 13, 2007 in which claims 1, 8, 9 – 11, and 13 – 21 were amended.

Status of Claims

Claims 1 – 21 are pending, of which, claims 1, 8, 9, and 16 are independent claims.

Allowable Subject Matter

Claims 1-21 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the present invention is directed to restricting data packet transfer in overload situations during packet-switched data transmission. The closest prior art (US Patent Application # 10/712,636 submitted by Pecan et al.) discloses a method and apparatus for enhancing wireless data communications. However, Pecan fails to disclose or make obvious a method and system having the aspects of acknowledgment from the link control layer and the intermission of data transmission until the link control layer acknowledges the receiving of a certain number of data units from the radio link layer. These claimed features being present in all the independent claims 1, 8, 9, and 16 render claims 1 – 26 allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
